

# Oracle SA iQ

Introducing BOFA's most technically advanced compact fume extractor designed specifically to meet electronics industry needs. The V Oracle SA iQ has been enhanced with BOFA's iQ Operating System, RFA and ACF technology and packs a powerful range of unique features into one compact unit.

The iQ Operating System performs at two distinct levels: Operators benefit from the ease of operation and clarity of real time information and the system provides a cache of analytical data, enabling users to download performance and operating parameters for evaluation purposes.

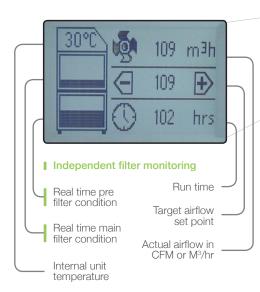

The iQ system takes performance and safety parameters to a new level and ensures that maintenance downtime and ownership costs are kept to a minimum.

## STANDARD FEATURES:

- iQ Operating System
- **Automatic Flow Control**
- Reverse Flow Air filter technology (RFA)
- Advanced Carbon Filter technology (ACF)
- Auto sensing voltage (90-257v) - For global use
- High contrast display
- Real time airflow reading
- Filter status warnings

- Independent filter condition monitoring
- 'Run safe' operation (filters must be installed correctly for the unit to operate).
- Remote data diagnostics via USB
- Low cost replacement filters
- Low noise levels
- Lockable castors
- Small footprint

The complete, compact, global solution for high performance fume extraction for the electronics industry.

## OPTIONAL FEATURES:

- VOC gas sensor (Volatile Organic Compound)
- Interfacing
- Remote stop / start interface
- Filter change / System fail signal
- Optional filter medias

Patented Technology - Patent No: GB2 499 812
